TITLE : PAPER SHEET TREATMENT
APPARATUS

ABSTRACT : PROBLEM TO BE SOLVED: To package a paper sheet bundle to be discharged from a plurality of bundled parts by a single packaging part without disposing any packaging machine for each plurality of bundled parts.

SOLUTION: A paper sheet treatment apparatus comprises a plurality of bundled parts 8a-8d which stack the paper sheets in a predetermined number of sections, bundle the paper sheets stacked in the sections and discharge them as the paper sheet bundles, sub and main conveyors 12a, 12b and 15 to carry the paper sheet bundles to be discharged from a plurality of bundled parts 8a-8d, and a packaging machine 14 which stacks the paper sheet bundles to be carried by the sub and main conveyors 12a, 12b and 15 in sections of the predetermined number, and selectively packages the paper sheet bundles stacked in the sections by the single packaging part 25 to form the paper sheet bundle.
